

RECO PROCESS PUMPS

Acid Sludge Pumps

Phosphoric acid transfer/Sludge/Filtration area, Copper/Zinc, pulp & paper 4-5% consistency applications

- ❖ 2-5% consistency stock pumps with 10+ YEARS of trouble free continuous operation.
- ❖ 12-14% medium consistency stock pumps with inbuilt vacuum rotor design with a proven record of 10+ YEARS in operation.
- ❖ Center supported high temperature pulp digester circulation, evaporator circulation, steam jacketed 60% solid black liquor applications pumps with a proven record of 10+ YEARS of continuous operation.

MOC: Duplex steel / Sanicro 28 / Hastelloy C-2000, G-30
